

FAQ: Remote Work & Equipment Allocation

Version: 2026.1

Department: Human Resources / IT Operations

Classification: Public (All Employees)

1. Remote Work Eligibility

1.1 Can I work from anywhere?

While we are a "Remote-First" company, for tax and legal compliance, you must reside and work from the country listed in your employment contract. If you plan to work from a different country for more than 14 days, you must submit a **Digital Nomad Request** via the HR Portal for approval.

1.2 What are the expectations for a home office?

Employees are expected to have a dedicated workspace with a stable internet connection (minimum 50 Mbps download / 10 Mbps upload) to support high-quality video conferencing.

2. Equipment Allocation

2.1 What equipment will I receive on my first day?

Every new hire is provided with a standard "Welcome Kit" based on their role:

- **Standard (Non-Eng):** MacBook Air (13-inch), Magic Mouse, and Laptop Stand.
- **Engineering/Design:** MacBook Pro (14 or 16-inch), High-resolution External Monitor, and Mechanical Keyboard.

2.2 How do I get my equipment?

IT ships equipment via FedEx to arrive 48 hours before your start date. You will receive a tracking number from it-ops@company.com. If your package hasn't arrived by 24 hours before your start date, please alert your HR Onboarding Buddy.

3. Home Office Stipend

3.1 Is there a budget for home office furniture?

Yes. All full-time employees are eligible for a **One-Time Home Office Stipend of \$500 USD**.

- **Eligible Items:** Chairs, desks, lamps, and ergonomic supports.
- **Non-Eligible Items:** Decorations, plants, snacks, or recurring internet bills.

3.2 How do I claim the stipend?

1. Purchase your items.
2. Save the itemized receipts.
3. Submit a "New Hire Stipend" claim through the **Expensify** portal within your first 60 days.

4. Maintenance and Replacements

4.1 My equipment is broken. What do I do?

If your hardware malfunctions:

1. Open a ticket in the #it-support Slack channel.
2. If the IT team deems it unfixable, they will ship a replacement via overnight mail.
3. You must return the broken unit in the provided prepaid box within 5 business days.

4.2 Can I upgrade my equipment?

Standard upgrades are available every 3 years. If you require an earlier upgrade due to specific project needs, your Department Head must provide written budget approval to IT Ops.

5. Security and Compliance

5.1 Can I use my personal laptop for work?

No. To protect company and customer data, all work must be performed on company-issued hardware. Accessing internal databases or codebases from personal devices is a violation of the **Data Security Policy**.

5.2 Do I need to return the equipment if I leave?

Yes. All company-provided hardware must be returned upon termination of employment. A return shipping kit will be mailed to your home on your final day.
